URIs
 es:processeschangedsincecheck
 -> Running processes have changed since last check. Occurs periodically
 Interval: 5 min

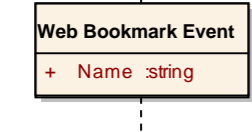

URIs
 eb:command
 -> Command has been executed in the Bash

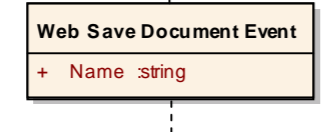

URIs
 es:monitoringstarted
 -> UACA has started to monitor activities

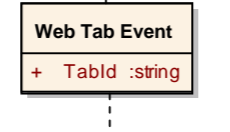

URIs
 ew:navigate
 -> User has navigated to web content
 TransitionTypeUri
 enum:webnavigateevent/transitiontype#bylink
 -> User has navigated by clicking link
 enum:webnavigateevent/transitiontype#byurl
 -> User has navigated by entering URL
 enum:webnavigateevent/transitiontype#bybookmark
 -> User has navigated by selecting bookmark
 enum:webnavigateevent/transitiontype#unknown
 -> Unknown transition type

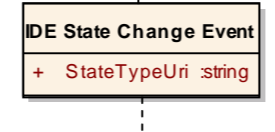

URIs
 ew:bookmark
 -> User has created new bookmark

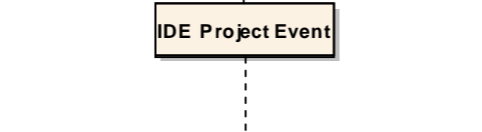

URIs
 ew:savedocument
 -> User has saved or downloaded content

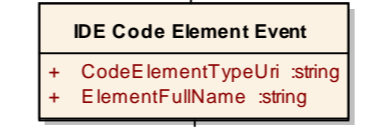

URIs
 ew:tab/switchto
 -> User has switched to browser tab or opened new browser window
 ew:tab/open
 -> User has opened new browser tab
 ew:tab/close
 -> User has closed browser tab

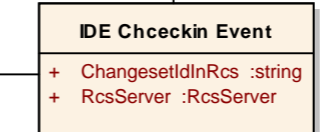

URIs
 ei:statechange
 -> State of the IDE has changed
 StateTypeUri
 enum:idestatechangeevent/statetype/[idename]#[value]
 idename
 vs - Visual Studio
 eclipse - Eclipse
 value
 debug
 -> IDE is in the design mode
 build
 -> IDE is in the build mode
 design
 -> IDE is in the design mode [IDE perspectives]
 -> IDE is in some perspective. Name of the current perspective

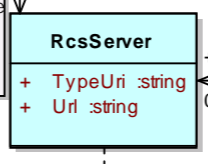

URIs
 ei:project/switchto
 -> User has switched to the software solution/project
 ei:project/add
 -> User has added new software solution/project
 ei:project/remove
 -> User has removed the software solution/project
 ei:project/rename
 -> User has renamed the software solution/project
 ei:project/open
 -> User has opened the software solution/project
 ei:project/close
 -> User has closed the software solution/project
 ei:project/refresh
 -> User has refreshed the view of the software solution/project

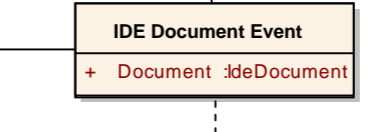

URIs
 ei:codeelement/visiblestart
 -> Code element has begun to be part of the user viewfield
 ei:codeelement/visibleend
 -> Code element has ended to be part of the user viewfield
 ei:codeelement/editstart
 -> User has started editing code element
 ei:codeelement/editend
 -> User has ended editing code element
 CodeElementTypeUri
 enum:idecodeelementevent/codeelementtype
 #namespace
 -> Element is namespace
 enum:idecodeelementevent/codeelementtype
 #class
 -> Element is class
 enum:idecodeelementevent/codeelementtype
 #method
 -> Element is method
 enum:idecodeelementevent/codeelementtype
 #property
 -> Element is property
 etc.

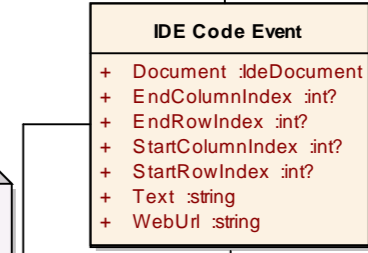

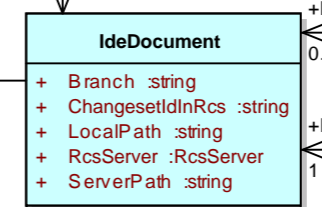

URIs
 ei:checkin
 -> User has committed source code version to the revision control system

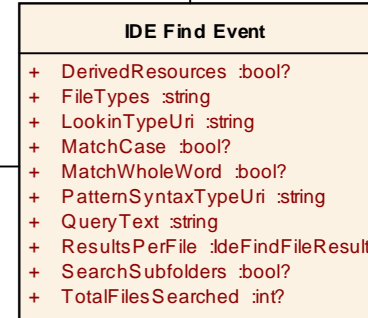

TypeUri
 enum:rcsserver/type#tfs
 -> MS Team Foundation Server
 enum:rcsserver/type#git
 -> GIT

URIs
 ei:document/switchto
 -> User has switched to the document
 ei:document/add
 -> User has added new document
 ei:document/remove
 -> User has removed the document
 ei:document/rename
 -> User has renamed the document
 ei:document/open
 -> User has opened the document
 ei:document/close
 -> User has closed the document
 ei:document/save
 -> User has saved the content of the document

URIs
 ei:code/paste
 -> User has pasted text into the source code
 ei:code/pastefromweb
 -> User has pasted text into the source code. Text has been copied from web
 ei:code/selectionchanged
 -> Source code or its part has been selected by user
 ei:code/copy
 -> Source code or its part has been copied by user
 ei:code/cut
 -> Source code or its part has been cut from the source code document by user

URIs
 ei:find
 -> User has searched for information in source code using built-in search engine
 LookinTypeUri
 enum:idefindevent/lookintype/[idename]#[value]
 idename
 vs - Visual Studio
 eclipse - Eclipse
 value
 currentdocument
 -> Search scope is set to current document
 currentproject
 -> Search scope is set to current project
 entiresolution
 -> Search scope is set to entire solution
 PatternSyntaxTypeUri
 enum:idefindevent/patternsyntaxtype/[idename]#[value]
 idename
 vs - Visual Studio
 eclipse - Eclipse
 value
 regex
 -> Search by regular expression
 wildchar
 -> Search by wildchar convention
